Keymacro is a cloud-based software that allows you to automate any repetitive task. It allows you to make macros in any software, either in Microsoft Office, PowerPoint, etc. or in any third-party application, such as web browser, email client, image editor, video editor, drawing program, and so on. With the Keymacro, you can create macros for a variety of tasks, such as saving a web page, sending a mail, formatting a document, making a video or taking a screenshot. It also helps you save your time and make your work easier. With Keymacro, you can quickly create a set of commands to work on your screen, key strokes, or other actions. For example, you can send an email by the use of a single macro instead of entering the same data each time. If you save a set of actions as a macro, you can call it as a single-step activity, or you can call it again in the future. You can also start the macro automatically by calling it from a program. Keymacro is a completely free software and is available for Windows, Mac, and Linux operating systems. Keymacro Features: 1. Automatically call macros every 30 minutes. 2. The macro file can be called from the computer or cloud. 3. Auto-start macro when computer on. 4. Display data entered to the Macro. 5. Fast startup time. 6. Run Macros at any time and anywhere. 7.
