* Click here for information about basic Photoshop tutorials, and the chapter on tutorials has more information on Photoshop. Tutorial: Let's Start the Photo Editing Adventure Photoshop is a versatile piece of software, and you have a lot of choices when you edit your photos in Photoshop. The simpler the image you shoot, the faster you'll make edits. Most people get by with a combination of adjustments and quick editing as they apply filters and make their edits, but there are times when it's time to think more carefully about a photo. The best way to learn how to use a new feature is to make a few good edits and look at your photo after each edit, instead of simply trying to apply a few fixes. In this example, begin with a photo of some leaves and a small rock. Using the tool of your choice, drag and drop the picture onto the canvas and then begin the process of modifying the edges and colors of the subject to create a larger selection. Tools and Features --- The following are some tools and techniques you may find useful to enhance the images in this chapter. * A new layer (Layer/New Layer from Background) to be replaced with a new layer mask * Lasso selection tool * Select and Mask * Healing brush * Basic image editing tasks, including Cropping, Levels, Adjustments, and Color/Hue/Saturation 1. Click the Layers palette at the top of the Photoshop workspace. This window shows the contents of the layers that are on the current canvas. In this example, the Layers palette contains the current image as it is displayed on the canvas. 2. Click the new layer button in the palette's lower-left corner to create a new layer. 3. From the Layers palette, double-click the new layer to activate it. 4. By using a painting program or video-editing program, trace around the leaves and rock to create a vector mask for the subject. To do so, select all the visible portions of the subject that you want to include in the edit, and then use the Lasso or Polygonal Lasso tool to create a selection around the subject (see Figure 13-1). Figure 13-1: Use the Lasso tool to create a selection. After you complete the selection, it appears in the Selection window. The cursor automatically moves to that selection. 5

Remember those lovable Subaru Crosstrek Outbacks that were released last year? You remember how they were a stiff, dinged-up, and not-so-fast back then? You know, the ones that came with that blurry, computer-generated image of a "gritty urban environment"? Well, this new 2019 Subaru Crosstrek Image Concept came out from the design team that was looking to improve on the fundamentals of the 2018 model. And when it comes to the fundamentals of a Subaru, that means AWD and a twisty-road-ready suspension setup. Instead of a "gritty city" and all that tech, this 2019 Subaru Crosstrek Image Concept takes a shot at a look that reminds me of the all-road Subaru Outback, with a racy and brights outlook. And that includes that new Impreza-based XL trims that will make their debut, as well. That Impreza-based trims include the 2019 Subaru Crosstrek XL Limited and the 2019 Subaru Crosstrek XL Premium. Both of those get a more rugged look with the addition of blacked-out headlights and a black front bumper, along with black fog lights. They'll also get Subaru's EyeSight Safety and Driver-Assistive Technologies, including the Brake Assist, Lane Departure Warning, Automatic High Beams, and EyeSight Adaptive Cruise Control. So, the 2019 Subaru Crosstrek Image Concept drops that perfect, bland look and comes out looking a little more rugged, depending on what trim you choose. It's not a complete departure, but just a shift in priorities, based on what the market is wanting from the brand now. There are a few that will never, ever let you know, like this one, that Subaru is thinking about the future. Especially when it comes to their successful, and growing, sub-brand. And, the success of the Subaru brand all across the world. And Subaru, in the past, has made sub-brands. From the long-lived, and still-trending, Bratwurst, to the more recent, compact, Baja, and, just about every other known sub-brand that has existed from the organization. Think about it for a minute: Your Subaru is a sub-brand, just like the Toyota-sub-brands. What's

Noche Del Cielo The Noche Del Cielo ("Night of the Sky") is one of the most important and distinctive festivals in Mexico. The term literally means "Night of the Sky", referring to the appearance of the meteor showers at the end of each year as the Earth approaches the Lagoon of Quivira, or Milky Way. The next Noche del Cielo is expected to be on 26 January 2015. The holiday lasts for several days, starting on 23 January and ends the next day, making the last night the festival's climax. During this night, many families get together to enjoy a long dinner, a fireworks show and open air shows around the country. In the morning, the "Festival del Pueblo" (), called Pueblo Jamón (literally Pueblo Ham), is celebrated where food prepared with local ingredients and spices are served. Since 2014, the Pueblo Jamón is the celebration's main attraction. Pueblo Jamón On 23 January (Domingo de Ramos, Christmas eve) the main attraction is the Pueblo Jamón, which takes place in various places in Mexico. It is a national holiday, with the motto "Pueblo, unidad y fraternidad" (CITY, UNITY AND BROTHERHOOD) in English. On the morning of the 24th the "Festival de la Paz" (), is celebrated in various places. Pueblo Jamón is celebrated in various places in Mexico as a national holiday, with the motto "Pueblo, unidad y fraternidad" (CITY, UNITY AND BROTHERHOOD) in English.
